How to Assemble the Flipbook

1. Copy each untabbed page as a separate stack. (For example, if you have 24 students in your class, makes 24 copies of page 1, 24 copies of page 3, etc. This will also be done for pages 5, 7, 9, 11, 13, and 15.)
2. Use the paper cutter and cut on the dark line at the bottom of each of these pages.
3. Put the remaining pages (2, 4, 6, 8, 10, 12, and 14) in the copy machine and make a collated set for each student in the class.
4. Hand out a collated set to each student. Have them cut around the tabs at the bottom of each tabbed page.
5. Pass out the untabbed pages that you already cut with the paper cutter. Have your students insert these pages in order.
6. Staple two times at the top, and your flipbook is assembled!

****OR****

1. Make a collated set of pages 1-15 for every student in your class.
2. Use two staples at the top of each flip book.
3. Instruct students to cut across the dark line at the bottom of every odd-numbered page.
4. Instruct students to cut around the tab on the even-numbered pages.

Ways to Use this Flipbook

- I start by introducing one of the literary devices by looking at the tabbed page. (For example, I discuss similes with my students, and have students open to the tabbed similes page.) We write a definition in the box. Students finish writing the sentences below the definition. I have them write their own complete sentence in the top left corner that proves their understanding of the given literary device. I give them a few minutes to start their illustration (but students usually finish the illustration later).
- We turn to the next page. I put my teacher copy under the doc camera and have students copy my example sentences (see pages 19-21) below the heading “class examples”. We discuss why each sentence is an example of that particular literary device.
- Next, I give students time to write 3-5 additional sentences independently. Each sentence they write should contain the given literary device.
- Finally, I tell students to look for examples of each literary device as they are reading throughout the day. When they find one, they should record it on the appropriate page, and write the name of the book and the page number where they found it.

Write a simile below, and illustrate it in the box.
