## New Earth Colony

Oh no! There was an explosion and Earth no longer exists. Lucky for you and a few others, you were on a space mission at the time. You have a lot of advanced equipment and technology on board your spaceship; therefore, you can survive any atmosphere or condition. You need to start a "New Earth" colony on one of the other 7 planets (Mercury, Venus, Mars, Jupiter, Saturn, Uranus, and Neptune).

Which planet would you pick? \_\_\_\_\_

What name would you give this "New Earth" colony? \_\_\_\_\_

List 4 reasons why you chose this planet, above the others (you will need to research the planets).

- \* \_\_\_\_\_

- \* \_\_\_\_\_
- \* \_\_\_\_\_

Draw and colour a picture of your new home on a separate piece of paper, making sure to include the planet surface, your colony buildings and any other details you can provide.
